### Candidate Statement:

I have been the director of the Saint Louis University Department of Dermatology's Contact Dermatitis and Patch Testing Service for over 13 years. I receive referrals from Dermatologists and Allergists throughout the state of Missouri as well as surrounding states for comprehensive patch testing. We test between 250 and 300 patients annually. My particular area of interest is education, both of contact dermatitis patients and of future dermatologists in my role as program director for the Saint Louis University residency program.
