Select product categories

Three ways to give list to patient
• Print
• Save to CD
• E-mail

Can Click “back” to redo search
Print-out same if printed or e-mailed
Page 1 of printout;
• Web address
• Search codes
• Description of allergic contact dermatitis

Testing has shown that you have allergic contact dermatitis. This means that you are particularly sensitive to even extremely small amounts of these substances:

• Fragrance - standard

You are so sensitive to these substances that if your skin comes in contact just one time with any of them, you may develop a rash. Itching, pinkness, small bumps, or blisters may appear within 4 hours, but usually starts 1 to 3 days after exposure to the substance.

The skin reaction lasts from 2 to 8 weeks, even if you don’t come into contact with the substance again.
CAMP: Review of the Basics
Safe List; Page 2

- Page 2 of print-out;
  - How to use the list
  - Products sorted by category, then brand
  - Shows number of products in category
  - Shows number that are safe for patient

- Click on “Narratives List”
- Covers allergens on ACDS Core Series
- Click on narrative of interest
CAMP; Review of the Basics
Avoidance Narratives

- Created by Diane Silvestri using patient education best practices
- Reviewed by two additional board members
- NEW!! Narratives In Spanish.

**BENZYL SALICYLATE**

*also called...* salicylic acid benzyl ester, 2-hydroxybenzoic acid phenylmethyl ester, and benzyl o-hydroxybenzoate.

*What is it?*
Benzyl salicylate is a widely used solvent with a slight pleasant odor. It is formed by combining benzyl alcohol with salicylic acid.

*Where might it be found?*
- cologne
- perfume
- body spray
- aftershave
- moisturizing cream
- lotion
- facial moisturizer
- anti-aging cream
- night serum, oil
- hand cream
- toothpaste, lip gloss

*How to avoid it:*
Avoid using any product that contains benzyl salicylate or one of its other names listed above. In some products it may be added as an unspecified “fragrance” or “parfum.” Therefore it is best to avoid all fragranced products.

Be sure to check the complete ingredient list on the label of each product you use. If you cannot find the ingredient list, go to the store and inspect the original box or package. Some products’ ingredient lists are available...
